

## Anti-rust Lubricant TDS

**Product Description :** 7CF® The product is anti-rust aerosol that quickly cleans, penetrates, lubricates and protects against corrosion. Anti-rust Lubricant spray stops squeals, loosens rusted parts and displaces moisture. It can effectively isolate moisture and other corrosive substances from contacting the surface of the material, thereby avoiding metal factors from oxidizing and rusting; it has good infiltration and penetration performance, can infiltrate rust and glue, and can be used to loosen rust and remove residues of double-sided tape Smudges, etc.; it has strong lubricating properties, lubricating movable machinery and parts. Features & Benefits: Penetrates fast; Dissolves rust & corrosion; Lubricating film displaces water and prevents rust.

**Applications :**

- Precision parts : electrical contact points, steel parts, highly sensitive components, machinery, ordnance, power tools, and precision instruments etc. ;
- Eases disassembly of mechanical equipment, fittings and fixtures , rusted and frozen metals, such as bolts, nuts, hinges, exhaust clamps, fishing reels, wet engines, seat slides, door locks, clocks, bicycle for routine maintenance and emergency repairs;
- Automobiles
- Agricultural equipment
- Household items
- Plumbing fixtures

**Features & Benefits:** Free rusted part; Lubricates & Protects; Stops squeak; Displaces moisture; Cleans, dissolves grease, dirt, etc.

**Unit Package Description:** 10 OZ. AEROSOL

**Brand :** 7CF

**Odor:** Pineapple Aroma

**Film Type:** Thin, Non-Drying

**Flash Point:** >50°C

**Boiling Point:** > 200°C

**Solubility (water):** Negligible

**Percent Volatile:** > 20%

**Propellant:** Hydrocarbon

**Specific Gravity:** 0.80–0.83

**Vapor density:** >1 (air=1)

**Film thickness:** 0.6 to 2.0 microns

**Insulation Strength:** > 40 kV

**Rust Resistance:** up to 6 months indoors (iron and non-ferrous metals)
