

Silicone Spray TDS

Product Description: 7CF Silicone Spray is a general purpose liquid aerosol lubricant, primarily designed to reduce friction in non-load bearing mechanical assemblies. The product repels water, protects and renews surfaces, stops friction and squeaks, prevents binding, sticking and deterioration. Non-gumming. Lubricates and waterproofs all types of mechanical equipment. Will not mar paint, rubber or plastic surfaces.

Applications:

- Automobiles, bike, spark plug insulators etc.
- Industrial machinery: precision instruments, plastic mold release, electronic tools & equipment, metal parts
- Agricultural equipment: agriculture tools & equipment
- Household items: locks, latches & hinges, rubber parts, seals, hoses, sliding windows & doors
- Plumbing fixtures

Features & Benefits: Excellent lubricating and glazing; Stops squeaks, friction and corrosion; Renews rubber surfaces; Waterproof

Unit Package Description: 10 OZ. AEROSOL

Brand: 7CF

Appearance: Clear liquid

Odor: Mild

Odor Threshold: Not established

Chemical Type: Silicone

Film Type: Thin, Non-Drying

Flash Point: Aerosol, contents under pressure

Boiling Point: -44°F to 290°F

Ejection rate (%): ≥ 96

pH: Not Applicable

Viscosity: ~1000cst

Specific Gravity: 0.95 - 0.98

Solubility (water): Negligible

Vapor Density: >1 (air=1)

Cold resistance: keep at (0-5 °C) for 24h, return to room temperature, it can be used normally
